

BEAUTIFUL LAKES AND LAKE DAYS OR INVASIVE MUSSEL INFESTATION?

**STOP INVASIVE MUSSELS.
PROTECT OUR WATERS.**

Okanagan Basin
WATER BOARD

Invasive mussels are closer than you think.

Invasive mussels have been found in places close to us. Just one contaminated watercraft can put Okanagan waters at risk.

If you're visiting or an Okanagan resident, you can help stop their spread by taking simple actions:

- Stop at ALL watercraft inspection stations if visiting with watercraft.
- Pull the plug off your boat before travelling.
- Clean. Drain. Dry boats and gear.
- Coming from infested areas, it's better to rent watercraft locally instead.

Protecting our lakes is a shared responsibility.
